# Frogs

## What's the gist?

- Spring peepers, Cope's gray treefrogs, and Bronze frogs are few of the many species of frogs that are common to the wetlands in Louisiana and other eastern states.
- The spring peeper is about one inch in size (the size of a paper clip).

## Activity Corner

Check out these awesome activities for an enriching learning experience!

[Kid Zone Activity Website:](#)

This website has printable frog coloring sheets, riddles, songs, life cycles, crafts, and small coloring foldable books for young children.

Take time to sit outside at night and listen to the calls of frogs and toads.

Want to make a difference? FrogWatch USA is a Citizen Science program that provides individuals opportunities to learn about wetlands in their communities by reporting on the calls of local frogs and toads. Amphibians are important animals in wetlands ecosystems and are considered indicators of environmental health. To learn more how you can participate in amphibian conservation efforts and to listen to frog and toad calls follow this
